

Public Water Supply District #1 Call Before You Dig

To prevent disruption of service to you and our other customers, please call Missouri One Call at 800-DIG-RITE (1-800-344-7483) two working days before doing any digging – planting trees, building fence, landscaping, trenching, etc.

Tell One Call where you plan to dig, and they will let you know if our water lines are in the area. If they are, one of our field maintenance personnel will be out to mark the location of the lines.

NOTE: You will be charged for any water that was lost plus supplies and labor used to fix the leak if you hit our line and no One Call ticket was issued.
